Acknowledgements. The authors are grateful for the collaboration with IRTA staff for participation in the field campaigns carried out within the framework of the monitoring programme on water quality at the shellfish growing areas in Catalonia. Thanks for the data provided by Puertos del Estado and AEMET. This work received funding from the EU H2020 programme under grant agreement no. 730030 (CEASELESS project). The authors also acknowledge the funding and support received from the “Direcció General de Pesca I Afers Marítims” in the framework of the project “Anàlisi ambiental de les Badies del Delta de l’Ebre i el seu entorn. Cap al desenvolupament d’una eina per a la seva gestió integrada” and the project ECOSISTEMA (CTM2017-84275-R MINECO/AEI/FEDER, UE). We also want to thank the Secretaria d’Universitats i Recerca del Dpt. d’Economia i Coneixement de la Generalitat de Catalunya (ref. 2017SGR00773), who supported our research group.
