Published: 22 March 2022

During the initial submission process, several grant numbers were unintentionally omitted. The updated acknowledgements and financial support section, including the grant numbers, appears below.

Acknowledgements. The authors acknowledge the sustained efforts of researchers and funding agencies in observing and modelling the oceanic and atmospheric processes that control climate variability in the Indian Ocean region. These contributions during the International Indian Ocean Expeditions (I and II) and in the intervening years through national and international programmes, such as CLIVAR and GOOS, are fundamental to improving our knowledge of these systems and increasing our skill at forecasting variability and extreme events. We thank the IIOE-2 leadership team (<https://iioe-2.incois.gov.in/>, last access: 22 October 2021) for their unwavering efforts to share new discoveries and promote understanding of the importance of the Indian Ocean to the climate system and Earth's inhabitants. We are very grateful to Michael McPhaden, Lisa Beal, and an anonymous reviewer for their encouraging and constructive comments that have led to a more comprehensive and balanced synthesis of recent advances.

Financial support. Helen E. Phillips acknowledges support from the Earth Systems and Climate Change Hub and Climate Systems Hub of the Australian Government's National Environmental Science Programme and the ARC Centre of Excellence for Climate Extremes. The other authors would like to acknowledge the support from the following grants: Amit Tandon recognizes the Office of Naval Research (USA, grant no. N00014-17-1-2355), Caroline Ummenhofer recognizes the NSF (USA, grant no. AGS-2002083), Viviane Menezes recognizes the NSF (USA, grant no. OCE-1736823), Ryo Furue recognizes the JSPS KAKENHI (Japan, grant no. 16K05562), Shijian Hu recognizes the YIPA Chinese Academy of Sciences (China, grant no. 2018240), and Raleigh Hood recognizes NASA (USA, grant no. 80NSSC17K0258 49A37A). We additionally acknowledge the contribution of the SCOR office (USA, grant no. NSF-OCE-1840868) provided to Patricia Miloslavich and arranged by editor Hermann Bange.
