In the paper “Upper-ocean changes with hurricane-strength wind events: a study using Argo profiles and an ocean reanalysis” by Sala et al. (Volume 20, 1441–1455, 2024), an error occurred in Fig. 4. During production file upload, a wrong version of Fig. 4 was uploaded. Specifically, panels (a) and (b) were inadvertently replaced with panels (a) and (b) from Fig. 6. Figure 4 should be shown as follows:

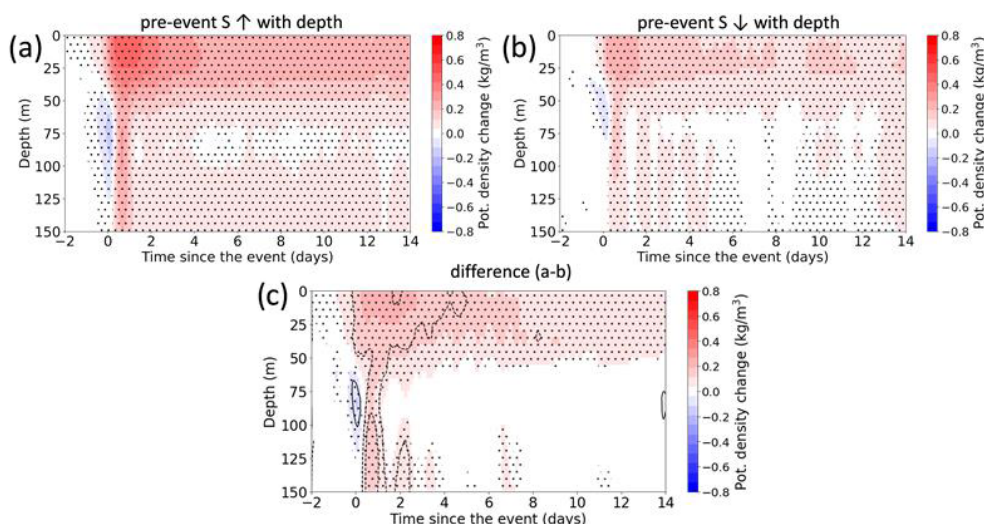

Figure 4. As in Fig. 3 but for potential density. Black contours in panel (c) indicate differences in temperature change between the increasing and decreasing case and are shown only when significant, as in Fig. S2c. A continuous line indicates positive values; a dashed line indicates negative values.
