

## ***Interactive comment on “Sources of 21st century regional sea level rise along the coast of North-West Europe” by T. Howard et al.***

**T. Howard et al.**

tom.howard@metoffice.gov.uk

Received and published: 21 March 2014

The authors wish to extend their thanks to the two anonymous referees for lots of helpful comments and guidance.

We have tabulated the reviewer comments and our responses as pdf documents in the associated zip file.

To assist the reader in identifying where changes have been made to the text we have also uploaded a pdf version of our submission with the major changes highlighted and each one referenced back to the reviewer comment which drove the change. Adjusted figures are included.

Thus, the zip file contains 3 documents:

C1000

A pdf version of our submission with the major changes highlighted.

A pdf table of all of the review comments and our responses (long).

A pdf table of only the most important comments and our responses.

If acceptable, we can of course supply a pdf of the revised version without the change highlighting, and any revised figures in png format.

Please also note the supplement to this comment:
