Received and published: 9 December 2013

First of all I'd like to thank the referee for his really careful reading of the paper. I agree almost completely with referees comment. Replying to his majorn concerns: -figures will be reorganized and x-axis homogenized. Some rearrangement of the relative position of figures will be also done. -English will be revised by a native English speaker.

Concenrning his specific comments I will provide a point-by-point reply as soon as I will receive other reviews of the paper and start the preparation of the revised version.

Best Regards, AO
