

Interactive comment on “Jason continuity of services: continuing the Jason altimeter data records as Copernicus Sentinel-6” by R. Scharroo et al.

R. Notarpietro

Riccardo.Notarpietro@eumetsat.int

Received and published: 14 January 2016

The GNSS-RO instrument is insufficiently covered in the abstract, introduction and several other places in the document. E.g. no information is given on the expected daily availability of occultations, or any other performance information. Please update the manuscript with this information.
