

Interactive comment on “On the observability of turbulent transport rates by Argo: supporting evidence from an inversion experiment” by G. Forget et al.

G. Forget et al.

gforget@mit.edu

Received and published: 19 September 2015

Dear Matthew Hecht, please find in the attachement our point by point response to all referee comments. We would like to thank the referees for their helpful suggestions. We also fixed a few additional language/grammar issues that were identified through our repeated proof-reading. The difference file and revised manuscripts are appended in the attachment.

Please also note the supplement to this comment:
