

Interactive comment on “An oceanographer’s guide to GOCE and the geoid” by C. W. Hughes and R. J. Bingham

M. Drinkwater

Mark.Drinkwater@esa.int

Received and published: 28 September 2006

This document is welcomed by ESA as supporting information in preparation for scientific exploitation of GOCE Satellite data products in Oceanography. The authors have carefully laid out definitions of terms and parameters in common use, and provided geodetic formulations in an attempt to establish clear standards for GOCE Level 1 and Level 2 data product use.
