

Interactive comment on “Nesting operational forecasting models in the Eastern Mediterranean: active and slave mode” by S. S. Sofianos et al.

S. S. Sofianos et al.

Received and published: 8 November 2006

The assimilation and validation of the MFS ALERMO and CYCOM systems (performed in the framework of MFSTEP project) are beyond the scope of this particular paper. Results discussed here are related only to the initialization procedures. Issues related to other comments are better clarified in the manuscript.
