

Interactive comment on “The subtropical Deacon cells” by J. A. Polton and D. P. Marshall

S. Griffies (Editor)

Stephen.Griffies@noaa.gov

Received and published: 10 November 2006

This is a very interesting paper. The authors have successfully revised the manuscript to address the reviewers' requests. It is ready for publication in Ocean Science.

I have a request, however: please provide a reference for "neutral density" referred to following equation (2). Although now becoming common in the field, it still may require a reference for some readers.

Thanks, and congratulations, Stephen Griffies
