

## ***Interactive comment on “Structure of phytoplankton (Continuous Plankton Recorder and SeaWiFS) and impact of climate in the Northwest Atlantic Shelves” by S. C. Leterme and R. D. Pingree***

### **Anonymous Referee #5**

Received and published: 1 December 2006

I think the paper is generally of the high quality, my only concern at this stage is the difficulty in reading the cumulative sums diagrams in figures 4, 4 and 6. Also the lack of consistency when using letter to refer figures, that is if using capital letters in the figures as is the case here in figures 4,5,6, then capital letters should be used in the caption as well.
