Interactive comment on “The M3A multi-sensor buoy network of the Mediterranean Sea” by K. Nittis et al.

K. Nittis et al.

Received and published: 21 December 2006

The authors would like to thank the referee for his constructive scientific and editorial comments on the manuscript. All of them will be taken into account for the preparation of a revised version. As suggested by the referee, sections 2.1 - 2.2 - 2.3 will be re-written to improve the way technical details of the 3 buoys are presented. Each of these sections will contain 3 sub-sections on a) system design and surface buoy b) instruments / sensors and c) control systems and data telemetry. Furthermore the quality of the pictures will be improved (including larger fonts) and all minor comments will be taken into account.
