Received and published: 31 October 2008

Dear Dr. Kasajima,

the reviews are in, both recommending only minor revision. Both considered the earlier 3 sections to be strong but have asked that sections 4 and 5 be clarified in a number of places, and so I would encourage you to concentrate some effort on these later sections. I look forward to seeing your responses to the reviewers' comments, and to receiving a revised copy of your paper.

Yours sincerely, Matthew Hecht
