Received and published: 20 February 2010

The authors are thankful to the referee for spotting a vague expression on p.98, line 24. We suggest to make the following change:

REPLACE 'each of the $12 \times 90 = 1080$ months' WITH 'each of the $12(\text{months}) \times 90(\text{years}) = 1080$ months'

On behalf of the authors, Georgy Shapiro
