

Interactive comment on “Stochastic heterogeneity mapping around a Mediterranean salt lens” by G. G. Buffett et al.

G. G. Buffett et al.

gbuffett@ija.csic.es

Received and published: 21 January 2010

The authors thank John Goff for his contribution to this manuscript. We have made all the minor changes he has suggested, paying particular attention to reference in the abstract to scale lengths, the font size for the annotation in figures 2 and 3, the definition of Gamma within the text (Equation 4) and changing the color of the arrow in figure 1 to black, considering the viewing inconvenience for those that are red-green color blind.
