We want to thank Dr. C. Laban for his comment on our paper “Operative forecast of hydrophysical fields in the Georgian Black Sea coastal zone within the ECOOP”. There is very pleasant fact to learn that Dr. Laban has read our article with a great interest and he has very positively estimated our work. We hope that this study will be interesting to experts-oceanographers who are engaged in dynamics of the internal seas. Kind regards, Demuri Demetrashvili
