Our reply to Anonymous Referee # 3

We would like to thank the Anonymous Referee # 3 for his comments and suggestion concerning the comparison of the model results with real data. 1. In the revised version of our paper, which we are preparing now, the special subsection will be included, where comparison of model outputs with observational data will be described. 2. In the revised version all minor syntax errors specified by the Referee will be corrected. Kind regards, Authors: Avtandil Kordzadze, Demuri Demetrashvili
