

Interactive comment on “Eddy characteristics in the Northern South China Sea as inferred from Lagrangian drifter data” by J. X. Li et al.

J. X. Li et al.

lijiaxun2009@yahoo.com.cn

Received and published: 22 September 2011

A revised manuscript with responses to the referees as indicated in the discussion has been submitted. Especially, we have expounded on the comment 5 of reviewer 2, about the cyclones and anticyclones. In addition, the English spelling and grammar have been carefully checked to ensure it easy to understand.

Many thanks for your helpful suggestions.

Sincerely, Jiaxun Li
