Received and published: 3 October 2011

First of all we appreciate to referees for their comments. According to referee general remarks we are going to add to the manuscript a section, presenting some scientific results obtained from different platforms described in the manuscript, - ‘4 The Black Sea dynamics according to observations during ECOOP’. In this section we are going to analyze the next topics: 4.1 Seasonal cycle of the Black Sea circulation; 4.2 Explanation of the formation and evolution of the Cold Intermediate Layer; 4.3 Black Sea stratification; 4.4 Characteristics of the internal wave from drifting buoys and oceanographic platform.

We hope after that the manuscript will become much better.
