

***Interactive comment on “Interannual response of global ocean hindcasts to a satellite-based correction of precipitation fluxes” by A. Storto et al.***

**P.-Y. Le Traon (Editor)**

pierre.yves.le.traon@ifremer.fr

Received and published: 14 June 2012

dear dr. Storto,

both reviewers feel that your manuscript requires a major revision. Could you answer to the reviewers' comments and prepare a revised manuscript before the end of June ? I'll ask the two reviewers to look carefully again at your paper. Let us know as soon as possible if you do not intend to submit a revised paper and/or cannot meet this deadline.

best regards Pierre Yves Le Traon
