Received and published: 9 December 2016

Dear Dr. Chu, based on the assessments of the referees, I have to conclude that there are fundamental issues that preclude further consideration of this work. I'm very sorry to say that we are rejecting your paper for publication.

You may either formally withdraw the paper at this point, or alternatively we will terminate the review process after the Discussion period ends later this month (I will be offline then, so it would be an additional week or so before this would be done).

I wish you well with your work.

Sincerely yours, –Matthew Hecht
