Interactive comment on "A simple predictive model for the eddy propagation trajectory in the South China Sea" *by* Jiaxun Li et al.

Hecht (Editor)

mhecht@lanl.gov

Received and published: 10 January 2019

Dear Authors, in consultation with one of the referees we now also have what should be considered as a third review, uploaded here as a supplement. I would ask you to please fully address all points raised in all three reviews (this supplement and the two pre-existing reviews).

I look forward to receiving your response.

Sincerely yours, –Matthew Hecht
