23 **Introduction**

24 The figures and tables which support the results discussed in the manuscript “**Mixed layer depth**
25 **variability in the Red Sea**” are given below. Detailed description on the attached figures and tables is
26 given in the manuscript. A brief summary is given in the following lines.

27 Figure S1 shows the monthly distribution of the temperature profiles along the main-axis of Red Sea. The
28 number of profiles are marked at the top right corner in each sub-figure. This document also includes bar
29 charts showing the number of selected profiles along the main-axis of Red Sea based on the year (Fig.
30 S2) and month (Fig. S3) of measurement. Similarly, a bar chart is included to show the number of profiles
31 with salinity values in the study area (Fig. S4).

Deleted: Figure S1 shows the monthly distribution of the temperature profiles along the main-axis of Red Sea. The number of profiles are marked at the top right corner in each sub-figure. This document also includes tables of number of profiles removed at different steps of quality checking procedure and the number of selected profiles along the main-axis of Red Sea based on the month and year of measurement. Similarly, a table is included to show the number of profiles with salinity values in the study area. ¶
