Received and published: 14 April 2020

The authors have provided a strong reply to the reviewers' comments, and I feel this is close to publication. I have asked for Rev 1 to look at it again since they asked for major revisions, to ensure all comments have been taken into account.

I have one minor request of the authors for the final version: please don't use the rainbow colour scheme in the figures - they are really tricky for people with colour blindness to see. Please look at the cmoccean package and use the colormaps there instead.
