

Interactive comment on “Determining the dependence of the power supply to the ocean on the length and time scales of the dynamics between the meso-scale and the synoptic-scale, from satellite data” by Achim Wirth

Achim Wirth

achim.wirth@legi.cnrs.fr

Received and published: 17 January 2020

In the discussion section, page 8 line 21 should read:
opposing gradients in space (including smaller scales reduces the power input) and time (including shorter scales increases
