Dear Trevor,

We feel that we have fully addressed all discussion contributions. As we address the issues in the interactive discussion we have been updating the manuscript at the same time. In this way, I attach the revised and updated manuscript as pdf with the changes suggested in the discussion phase.

Besides, we believe that you should know that the title of the paper has been updated at the request of SC1, from "Temporal evolution of Red Sea temperatures based on insitu observations (1958–2017)" to the new title "Temporal evolution of temperatures in the Red Sea and the Gulf of Aden based on in-situ observations (1958-2017)".
