

***Interactive comment on “Measuring ocean surface velocities with the KuROS and KaRADOc airborne near-nadir Doppler radars: a multi-scale analysis in preparation of the SKIM mission” by Louis Marié et al.***

**Anonymous Referee #2**

Received and published: 2 March 2020

The paper is too long (33pp+15pp), the text is confusing in many places and should be re-written. Please see my detailed review in a separate file.

Please also note the supplement to this comment:
