

Interactive comment on “Norwegian Atlantic Slope Current along the Lofoten Escarpment” by Ilker Fer et al.

Anonymous Referee #1

Received and published: 5 April 2020

Dear Ilker Fer

Yes, this is one of the nice things about Ocean Science, that you can discuss topics in a less formal way than with the traditional review process.

But, I feel that you have addressed all my comments thoroughly and I have no further concerns.

Congratulations on a job well done
