Dear Mattias and David,

I have received a 2nd review for this paper by email, as the reviewer has had some technical difficulties in uploading it. I will upload it as the second review then we can close the discussion. There are quite a few (mostly minor) points to address, and I'm sure you will want to respond to Phil Woodworth's comments as well.

I look forward to reading your response and revision in due course.

Best wishes,
