

Interactive comment on “Subsurface Initiation of Deep Convection near Maud Rise” by René M. van Westen and Henk A. Dijkstra

Matthew Hecht (Editor)

mhecht@lanl.gov

Received and published: 26 August 2020

Dear Authors, having read and considered the two anonymous reviews, and the comment from Ethan Campbell, I believe it unlikely that you'll be able to overcome the major objections that have been raised. If you believe otherwise then I will consider a revised manuscript. But I do think that you should consider withdrawing at this point.

I'm sorry to deliver this assessment. I know that good work has gone into this effort.

Sincerely yours, –Matthew Hecht
