

Second review of the paper

Impact of a medicane on the oceanic surface layer from a coupled, kilometre-scale simulation

Marie-Noëlle Bouin and Cindy Lebeaupin Brossier

This version has been improved compared to the previous one. The authors have taken into account the comments made during the first review.

One minor point;

Line 250: please verify “and SI” in relation with the variables shown in Table 2.

No need for another review.

I recommend **accept**
