Received and published: 18 December 2020

Dear Author,

Based on the original comments of the two reviewers, and your responses, I am afraid that I cannot encourage you to submit a revised manuscript.

Both reviewers express the opinion that while you present some interesting results there is not enough "new" or "convincing" to warrant publication. More analysis and very major revisions would be required. Therefore, while I appreciate your responses to the detailed reviewer comments, the manuscript revisions that you propose fall short

C1

of what would be required for the manuscript to be publishable.

Thank you for your submission to Ocean Science, but I regret to inform you that I must reject your manuscript at this time.

Regards Andrew Moore
