

Dear Editor and Reviewers,

Thank you very much for giving your time to evaluate/handle our manuscript. We really appreciated the clear communication, timely reviews and constructive feedback.

We have made all the minor corrections recommended by Dr Carolyn Begeman, except:
L211: Isn't the reason more that mCDW intrusions are spatially localized and that AM02 and AM06 aren't quite along the same flowpath than that it is due to a deeper ice draft?
Since —while plausible— this is speculation and not something that we can test with the available data.

Thank you again,
Madelaine Rosevear
